FOR IMMEDIATE RELEASE

2010 NEWS IN THE VALIANT RANGE

NEW LAYOUT for the Valiant V450 Sport

Easy to use, compact and easy to store once the season is over, that craft is affordable and have an excellent design for touring during the week-end, navigation near the coast and recreational activities. The new ergonomics of the V450 Sport has been specially studied in order to offer a maximum of comfort. The three seats and the two large storage spaces make of that boat a very nice and convenient small craft at a very competitive price. As all the V boats of the leisure Valiant range, the boat is available in two different sets of colors. The dark grey and red colors

give a more aggressive and sportive style whereas the white and blue configuration is more in the traditional marine style.

The new S4 seat is standard on the V450 Sport. Its nice design gives a real sportive style to the boat. The storage space under the seat is particularly large and convenient for such a small boat.

The new S4 console is standard on the V450 Sport. Equipped with a front seat, it allows three people on board who will be comfortable installed.

Two different sets of colors for each boat of the V range

Valiant comes in 2010 with a full refresh of its leisure range. Each boat of the V range will be from now on available in two different sets of colors. The first and more sportive configuration will get bi-color dark grey and light grey tubes with red touches what give a more young and aggressive style to the boat. The other configuration proposes a white and blue bi-color tube corresponding more to the classic marine style. All of the upholstery color has been ammonized and will be exclusively white.

Some other features have been also added or changed as the steering wheel on the Sport and Cruiser models, the navigation frame on the 750 Cruiser that is now in stainless steel and also the front part of the 620 and 750 tube which is partially colored.
